- **Back-End**: Node.js, PHP, MySQL, MongoDB

Soft Skills: Communication, Problem-solving, Time management, Critical thinking

PROJECTS

Weather Notepad App:

- Developed a mini React.js web application integrating weather data and notepad functionality.
- Utilized Axios for HTTP requests, Material-UI for UI components, and Recharts for data visualization.
- Features include fetching weather data using the Weatherbit API, displaying weekly average temperature, rainfall, humidity, current temperature, and a bar chart of the previous week's temperatures, along with notepad functionality to add and delete notes. (Live Demo)

Agro Mall:

- Innovative e-commerce platform tailored for agricultural products with a robust backend developed in PHP and a sleek front end crafted with HTML, CSS, JavaScript, jQuery, Ajax, Bootstrap
- Features include an advanced admin panel with analytics, order management, expense tracking, billing software, offer management, user and role management, and secure delivery updates with OTP-based authentication. (Live Demo)

Global Cafe Management System:

- PHP-powered website for couple cafes providing privacy, auto ordering, timer, menu, and automated billing based on sitting time.

EXTRA-CURRICULAR ACTIVITIES

- **Coordinator, College Athletics Game:** Organized logistics for a college athletics game, showcasing leadershipand organizational abilities.
- **Participant, National College Hackathon:** Collaborated with a team of five to develop a website for visuallyimpaired individuals, showcasing problem-solving skills and teamwork in a competitive environment.
